

Phase Transition for

Activated Random Walk Models

Leonardo T. Rolla

Universidade de São Paulo

joint with:

Vladas Sidoravicius

XII ESCOLA BRASILEIRA DE PROBABILIDADE
XIITH BRAZILIAN SCHOOL OF PROBABILITY
OURO PRETO · MINAS GERAIS · BRASIL
ANTIGA ESCOLA DE MINAS · DE 03 A 09 DE AGOSTO DE 2008

MINICURSOS:

Amir Dembo
and **Andrea Montanari** (Stanford)
Gibbs Measures and Phase
Transitions on Sparse Random Graphs

Elisabetta Scoppola (Uni Roma Tre, Roma)
with the participation of **Alexandre Gaudillière**
Introduction to Metastability

PALESTRAS PLENÁRIAS:

M. Aizenman (Princeton)
R. M. Assunção (UFMG, Belo Horizonte)
S. Chatterjee (Berkeley)
A. van Enter (Rijksuniversiteit Groningen)
F. den Hollander (Leiden University and EURANDOM)
V. Pérez-Abreu (CIMAT, Guanajuato)
A. Ramírez (PUC, Santiago)
M. Sanz-Solé (Universitat de Barcelona)
Y. Velenik (UNIGE, Genève)

PALESTRA ESPECIAL:

Carlos Tomei (PUC, Rio de Janeiro)

COMITÊ CIENTÍFICO:

C. C. Y. Dorea (UnB, Brasília)
L. R. G. Fontes (USP, São Paulo)
C. - É. Pfister (EPFL, Lausanne)
T. Spencer (IAS, Princeton)
M. E. Vares (CBPF, Rio de Janeiro)

COORDENAÇÃO:

S. Friedli (UFMG)
B. N. B. de Lima (UFMG)

ORGANIZAÇÃO:

G. S. Atuncar (UFMG)
G. Braga (UFMG)
J. Moreira (UFOP)
V. Sidoravicius (IMPA)

Conservative interacting particle system on the lattice

jump	rate
$A \rightarrow B$	$D_A = 1, D_B = 0$ λ
$A + B \rightarrow 2A$	∞

At $t = 0$, $\eta^B(x) = 0$ $\eta^A(x) \sim \text{i.i.d. Poisson}(\mu)$

State: $\eta_t \in (\mathbb{Z}_+ \times \mathbb{Z}_+)^{\mathbb{Z}}$ Law: P^μ

Local Fixation: P^μ -a.s., for all Λ finite, there is t_0 such that for $t \geq t_0$, and x in Λ :

$$\eta_t^A(x) = 0$$

$$\exists \mu_c \in [0, \infty]$$

(nondecreasing in λ)

$$\mu_c > 0$$

$$\mu_c < \infty$$

$$\mu_c \leq 1$$

$$\mu_c \rightarrow 1 \quad \text{as } \lambda \rightarrow \infty$$

$$\mu_c < 1$$

$$\mu_c \rightarrow 0 \quad \text{as } \lambda \rightarrow 0$$

$$\exists \lambda > 0, \mu < 1 \rightarrow \text{NO FIXATION}$$

$$\exists \mu_c \in [0, \infty]$$

✓

(nondecreasing in λ)

$$\mu_c > 0$$

✓

$d=1$

(dzz, work
in progress)

$$\mu_c < \infty$$

easy

$$\mu_c \leq 1$$

✓

$d=1$

(dzz
Shellé)

$$\mu_c \rightarrow 1 \text{ as } \lambda \rightarrow \infty$$

✓

$$\mu_c < 1$$

?

$$\mu_c \rightarrow 0 \text{ as } \lambda \rightarrow 0$$

?

$$\exists \lambda > 0, \mu < 1 \rightarrow \text{NO FIXATION}$$
